

Figure S1. NTS inhibits BAX expression against LPS-induced cell death. Western blotting showing the inhibition of LPS-induced expression of BAX protein following treatment with 0.2 and 0.5 $\mu\text{g/ml}$ of NTS for 24 h. Relative expression levels of BAX protein were determined via densitometry and normalized to β -actin. Data are representative of three independent experiments. ** $P < 0.01$ and *** $P < 0.001$ vs. control. NTS, non-toxic sulfur; LPS, lipopolysaccharide; Con, control.
