Computer software prototype modifications (examples)

| Feature before	Version(s)	Data collection	Feature after	Version
	0.3.0	*Every time I want to erase a measure, I have to press the option again which is less practical [Interview4 – P1]*	 *The "Remove measurement" button stays active as long as it is not clicked a second time [Logbook – ML]*	0.4.0
	0.3.0	*Change the name "Ortho mode": it is not meaningful [Logbook – NC]* *Since "Ortho mode" is often used, why is it not included in the tool bar on the top of the screen? [Logbook – NC]* *In the right click menu there is a function "Camera -> Ortho mode" that I would have put in the tool bar. [Interview6 – P2]*	 *Added a "Plan view" button in the tool bar on the top of the screen.* *This replaces the Camera->Ortho mode function in the right click menu. [Logbook – ML]*	0.4.0
	0.3.0	*Absence of the option to save as. Saving then automatically deletes the original version. [Diary Day12 – P1]*	 *Many measuring sessions can be saved in the same model with File -> Save As… to save measurements in a new session. When a model comprises more than one measurement*	0.4.0

|				
	0.4.0	What does Polygon Picking mean? [Interview6 – P2] Right click language stays in English even if French option was chosen in Language menu [Logbook – NC]	Correction of translation problems in dialog buttons [Logbook – ML]	0.4.1
	0.4.0	The software generates too many automatic measurements [Logbook – NC]	 Addition of an "Original" measuring session (without automatic measurements) in the dialog box [Logbook – ML]	0.4.1
	0.4.0	Add more information to software such as version number and help button [Logbook - ML]	 Addition of a "?" menu containing "Help", redirecting to https://introlab.3it.usherbrooke.ca/mediawiki-introlab/index.php/MapIt#Utilisation_de_MapIt, and "About…" with a dialog box linking to same webpage. [Logbook – ML] (Note: version number was added to subsequent version 0.4.2)	0.4.1
Software coding only	0.4.1	When trying to open a scan on the software, I have a "fatal error" message and the software crashes [Logbook – NST]	Software coding only Solved an incompatibility between the last software version and app version following import of a model [Logbook – ML]	0.4.2
