

Supplementary Figure 3

**Legend:**

Absolute number of Foxp3+ cells A) and CD30+ cells B) per punch of the indicated groups. Symbols represent individual patient samples and bars indicate mean. For B) absolute cell numbers were divided into classes according the axis label. ## p<0.01 and #### p<0.0001 as determined by the Kruskal Wallis test. No indication means p>0.05 and is considered as not significant.
