

Supplemental Figure S6: Sth1-AA depletion effects both Rad26-dependent and Rad26-independent TC-NER. (**A-C**) CPD-seq analysis examining the repair of CPDs on both DNA strands across ~5200 yeast genes relative to the transcription start site (TSS) following 2hr repair in (**A**) *rad16*Δ WT-AA, (**B**) *rad16*Δ Sth1-AA, and (**C**) *rad16*Δ*rad26*Δ. CPD-seq data for *rad16*Δ*rad26*Δ was originally published in (Duan et al. 2020).
