Supplemental Figure S8: (**A**) Data from Figure 5A plotted against average coverage of NCP dyad positions (Weiner et al. 2015). (**B-D**) CPD-seq analysis examining the repair of CPDs on both DNA strands relative to the transcription start site (TSS) across ~5200 yeast genes following 2hr repair in (**B**) Sth1-AA (second replicate), (**C**) *rsc2Δ*, and (**D**) *rsc2Δ* (second replicate).
