

Figure S7

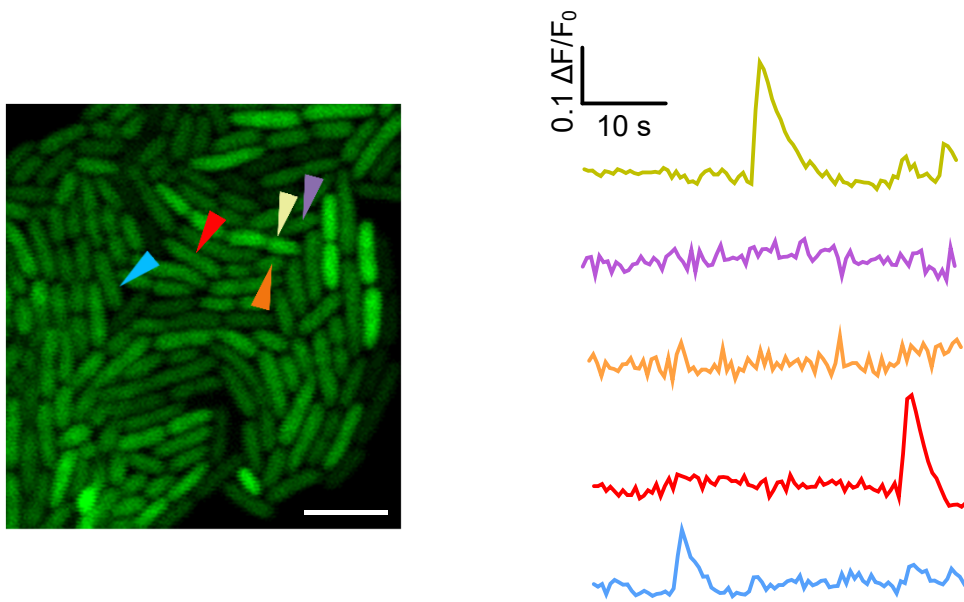

Figure S7. BacFlashes in *E. coli* colonies growing on agarose pad.

Left: confocal image of a single layer of an *E. coli* colony growing on an agarose pad. Scale bar: 5 μm .

Right: representative traces of pHluorin-reported BacFlashes in cells marked by arrowheads in the left panel. Traces and cells are matched by color. Note that BacFlashes do not propagate into neighboring cells.
