

Supplemental Table 3. Co-occurrence analysis of "oxidative stress" AND "mitochondria" studies in 2020

Count	Degree	Centrality	Year	Keyword
6	11	0	2020	mcu
6	4	0	2020	cardiovascular disease
6	7	0	2020	inflammatory bowel disease
6	11	0	2020	chain fatty acid
6	7	0	2020	high resolution respirometry
6	8	0	2020	anxiety
6	8	0	2020	lipid droplet
6	2	0	2020	apigenin
6	8	0	2020	long noncoding rna
6	6	0	2020	acute myeloid leukemia
6	7	0	2020	aldehyde dehydrogenase
6	5	0	2020	competence
6	12	0	2020	d-galactose
6	10	0	2020	mitochondrial calcium uniporter
7	10	0	2020	nash
7	7	0	2020	oligodendrocyte
7	10	0	2020	defense
7	15	0	2020	nonalcoholic fatty liver disease
7	48	0	2020	infarction
7	8	0	2020	semen quality
7	16	0	2020	mitochondrial transfer
7	7	0	2020	mitochondrial apoptosis
7	8	0	2020	lactate
7	9	0	2020	mitochondrial homeostasis
7	8	0	2020	pressure
7	8	0	2020	inflammaging
7	7	0	2020	blood-brain barrier
7	15	0	2020	cognitive deficit
7	3	0	2020	uric acid
7	9	0	2020	sirtuin 3
7	5	0	2020	osteoblast
8	6	0	2020	ketogenic diet
8	15	0	2020	parameter
8	7	0	2020	astaxanthin
8	5	0	2020	developmental competence
8	9	0	2020	mitochondrial dynamics
9	2	0	2020	polysaccharide
9	4	0	2020	nadph
9	9	0	2020	combination

<b>9</b>	3	0	2020	mitochondrial ro
<b>9</b>	3	0	2020	sulforaphane
<b>10</b>	6	0	2020	inflammasome activation
<b>11</b>	4	0	2020	gut microbiota
<b>12</b>	12	0	2020	nafld
<b>13</b>	2	0	2020	mitochondria dysfunction
