

Table S1. Bacterial Strains used in this study

Strain	Relevant characteristics	Source or reference
<i>P. gingivalis</i>		
33277	Type strain	ATCC
$\Delta fimA$	Isogenic mutant of 33277 lacking major fimbrial gene <i>fimA</i> , Erm ^r	[1]
$\Delta mfa1$	Isogenic mutant of 33277 lacking minor fimbrial gene <i>mfa1</i> , Erm ^r	[2]
$\Delta ltp1$	Isogenic mutant of 33277 lacking the low molecular tyrosine phosphatase gene <i>ltp1</i> , Erm ^r	[3]
$\Delta ltp1+ltp1$	Isogenic mutant of 33277 lacking the low molecular tyrosine phosphatase gene <i>ltp1</i> , and complemented with PT-COW-Ltp1, expressing functional Ltp1. Erm ^r and Tet ^r	[3]
$\Delta ltp1+ltp1^{C10S}$	Isogenic mutant of 33277 lacking the low molecular tyrosine phosphatases gene <i>ltp1</i> , and complemented with PT-COW-Ltp1 ^{C10S} , expressing catalytically dead Ltp1. Erm ^r and Tet ^r	[3]
$\Delta php1$	Isogenic mutant of 33277 lacking the tyrosine phosphatase gene <i>php1</i> , Erm ^r	[4]
<i>Escherichia coli</i>		
<i>TOP10</i>	Chemically competent cells	Invitrogen

^aErm^r, Tet^r, and Amp^r indicate resistance to erythromycin, tetracycline, and ampicillin, respectively.
