

Descriptions of Additional Supplementary Files

Supplementary Data 1

Description: Statistical comparisons of region-wise lesion loads and frequencies between men and women in the derivation cohort. Numbers in women and men were compared via two-sided t-tests (lesion loads) and two-sided Fisher's exact tests (frequencies). We here present resulting p-values, corrected for multiple comparisons.

Supplementary Data 2

Description: Statistical comparisons of region-wise lesion loads and frequencies between the left in the derivation cohort. Numbers in the left versus right hemisphere were compared via two-sided t-tests (lesion loads) and two-sided Fisher's exact tests (frequencies). We here present resulting p-values, corrected for multiple comparisons.
