

Supplemental Table. Survey answer choices to select from in response to vaccine willingness.

<p>Would you be willing to get vaccinated against COVID-19 if a vaccine was available for you?</p>	<p>Survey answer choices to select from (maximum of 3 may be selected)</p>
<p>If respondent answered “Yes, I would be willing to get vaccinated against COVID-19”</p>	<p>To protect myself from getting COVID-19</p>
	<p>To decrease the chance of getting seriously ill from COVID-19</p>
	<p>To protect my loved ones from getting COVID-19</p>
	<p>To protect others who are unable to get the vaccine because of health conditions</p>
	<p>To prevent any MS complications related to COVID-19</p>
	<p>Because my MS medication makes me vulnerable to COVID-19</p>
<p>If respondent answered “No, I would not be willing to get vaccinated against COVID-19”</p>	<p>I’m concerned about potential side effects</p>
	<p>I’m concerned about interaction between the vaccine and my MS medications</p>
	<p>I’m concerned that the vaccine will worsen my MS disease and/or symptoms</p>
	<p>I’ve had an allergic reaction to a component of vaccines in the past</p>
	<p>I am against vaccination in general</p>
	<p>I’m concerned that the vaccine was developed too rapidly</p>
	<p>It’s best to let nature take its course</p>
	<p>I don’t think that COVID-19 is dangerous to my health</p>
	<p>I’m afraid of injections</p>
	<p>I believe natural or traditional remedies are superior to vaccines</p>
	<p>I believe that vaccines contain poisons/toxins/contaminants</p>
	<p>I believe vaccination policies are motivated by profit</p>
	<p>I believe information about vaccine side effects are withheld from the public</p>
	<p>Religious reasons</p>
	<p>I think that people without MS should get the vaccine before people with MS</p>
	<p>I think the vaccine may have been rushed and would like more evidence to prove it is safe</p>
<p>I’m concerned about exposure to a public space (e.g. healthcare office) in order to receive the vaccine</p>	
<p>I have previously tested positive for COVID and am likely immune</p>	

	Other (please specify)
If respondent answered “I am unsure if I would be willing to get vaccinated against COVID-19”	I think that people without MS should get the vaccine before people with MS due to concerns about safety for people with MS
	I think political pressure rushed the vaccine trials and it should be tested more thoroughly to prove it is safe
	I would like it to be proven safe on a large-scale, population level to prove it is safe before I take it
	I'm concerned about exposure to a public space (e.g. healthcare office) in order to receive the vaccine
	Even if my doctor recommends it, I would like to assess the data that shows it is safe/effective prior to taking the vaccine
	Other (please specify)
