- VA Greater Los Angeles Healthcare System

In which clinical setting, do you primarily work?

- Community-based Outpatient Clinic (CBOC) or Annex
- Hospital-based Clinic

In the coming months, your VA is going to start a lung cancer screening program for certain patients. This program will include the following:

- 1. Identification of patients who are appropriate for screening (older persons, heavy smokers)**
- 2. Providers and patients discuss the benefits and risks of screening (shared decision-making)**
- 3. Provider orders screening test or refers the patient for screening**
- 4. Appointments for smoking cessation and screening are scheduled**
- 5. Smoking cessation services offered**
- 6. Screening study (CT scan) is performed**
- 7. Radiologist interprets the screening study**
- 8. Multi-disciplinary case review is performed as needed**
- 9. Screening results are sent to the referring provider**
- 10. Referring provider discusses the screening results with the patient**
- 11. Annual screening follow up or further evaluation is scheduled**

Please rate your agreement with each statement regarding this new lung cancer screening program.
