

S6 Table: The AIC score for increased viral clearance, viral neutralization, protection, and improved antigen presentation mechanisms for the baseline effector cell source (BL) model, saturated source (SS) model, and antigen presenting cell source (APCS) model for macaque RLn12

RLn12				
Mechanism	BL Model	SS Model	APCS Model	
Viral clearance	54.70	59.82	84.75	
Virus neutralization	55.83	73.47	88.44	
Protection	43.80	46.71	53.96	
Antigen presentation	97.62	92.50	58.03	
Antigen presentation with viral clearance	53.43	62.59	41.52
