

Table S3. Summary of visual field (VF) features affecting test-retest variability, in order of decreasing influence.

VF features associated with increased test-retest variability	VF features associated with decreased test-retest variability
Pattern standard deviation	AT1 (normal VF)
AT11 (concentric peripheral defect)	AT14 (superior paracentral defect)
AT12 (temporal hemianopia)	
AT9 (inferotemporal defect)	
AT6 (near total loss)	
AT2 (superior peripheral defect)	
Mean deviation	
False negative rate	
AT7 (central scotoma)	
False positive rate	
Age	

AT = Archetype
