

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: RAW data of shotgun proteomics performed on ALI cultures infected with HRV-C15 at 4, 12, 24 h post-infection. Data includes TMT labeling schemes, interquartile boxplot analyses, and proteins separated by time point.

File Name: Supplementary Data 2

Description: Metabolites identified by LC-MS from ALI cultures infected with HRV-C15 at 4, 12, 24 h post-infection. Benjamini-Hochburg correction was used to control for false discovery rate.
