

human reproduction SUPPLEMENTARY DATA

Supplementary Figure S13. Clearance analysis of hypo- and fully-glycosylated FSH. (a) Recombinant FSH18/21 and FSH24 preparation uptake and clearance patterns following intraperitoneal injection of 10 µg samples. (b) Recombinant FSH18/21 and FSH24 preparation uptake and clearance patterns following intraperitoneal injection of 1 µg samples. Each bar represents the means ± SEM of at least three mice.
