

Description of Additional Supplementary Files

File name: Supplementary Data 1

Description: Coefficient of the five-year all-cause mortality prediction model.

File name: Supplementary Data 2

Description: Single protein associations between protein levels and five-year mortality risk.

File name: Supplementary Data 3

Description: Single protein associations between protein levels and five-year mortality risk in participants older than 60.

File name: Supplementary Data 4

Description: Single protein associations between protein levels and mortality risk using the cox proportional hazards model.

File name: Supplementary Data 5

Description: Top results from protein pathway analysis.

File name: Supplementary Data 6

Description: Available measurements of baseline variables in all datasets.

File name: Supplementary Data 7

Description: Source data underlying all figures in the manuscript.
