

Table S1. Non-scrub typhus diseases identified in the study

Diagnosis	Number of patients
Tick bite	26
Rickettsial diseases	4
Lyme disease	4
Anaplasmosis	8
Q-fever	5
SFTS	5
HFRS	7
Malaria	1
Salmonellosis, Shigellosis	2
AIDS	5
Dengue fever	3
Chickenpox	3
Other Viral infections*	20
Bacteremia	22
Fungemia	1
Cellulitis	3
Abscess	2
Pneumonia	15
Gastrointestinal & biliary tract infection**	7
Acute gastroenteritis	10
URI	3
UTI	20
Arthritis	4
SLE	2
Raynaud syndrome	1
Wegener's granulomatosis	1
HLD	1
NSTEMI, IHD	3
MDS	1
Prostate cancer, Lymphoma, Adenoma, AML	4
Rhabdomyolysis	1
FUO	6
Total	200

SFTS (Severe Fever with Thrombocytopenia Syndrome), HFRS (Hemorrhagic Fever with Renal Syndrome), AIDS (Acquired Immunodeficiency Syndrome), URI (Upper Respiratory Infection), UTI (Urinary Tract Infection), SLE (Systemic Lupus Erythematosus), HLD (Herniated Lumbar Disk), NSTEMI (non—ST Elevation Myocardial Infarction), IHD (Ischemic Heart Disease), MDS (Myelodysplastic Syndrome), AML (Acute Myelogenous Leukemia), FUO (Fever of Unknown Origin)

*EBV, Herpes zoster, Influenza B, Viral meningitis

**Gastroenteritis, Enteritis, Cholangitis, Cholecystitis
