

Data Sharing Statement

Friedl. Prognosis of Patients With Early Breast Cancer Receiving 5 Years vs 2 Years of Adjuvant Bisphosphonate Treatment. *JAMA Oncol.* Published June 24, 2021. doi:10.1001/jamaoncol.2021.1854

Data

Data available: Yes

Data types: Deidentified participant data, Data dictionary

How to access data: De-identified data will be made available to other researchers, subject to approval of a formal data access request that includes a detailed description of the purpose/scientific rationale of the proposed project. Requests are reviewed by the SUCCESS study group Steering Committee and will be approved if the proposed projects have a sound scientific or patient benefit rationale. Data recipients are required to sign a formal data sharing agreement which describes the conditions for release and requirements for data transfer, storage, archiving, publication and intellectual property. Data will be available beginning 9 months and ending 5 years following article publication. Additional documents (e.g., full study protocol, informed consent form) are available from the clinical trial website of the SUCCESS study group at <http://www.success-studie.de/a/index.htm>.

When available: With publication

Supporting Documents

Document types: None

Additional Information

Who can access the data: De-identified data will be made available to other researchers, subject to approval of a formal data access request that includes a detailed description of the purpose/scientific rationale of the proposed project. Requests are reviewed by the SUCCESS study group Steering Committee and will be approved if the proposed projects have a sound scientific or patient benefit rationale. Data recipients are required to sign a formal data sharing agreement which describes the conditions for release and requirements for data transfer, storage, archiving, publication and intellectual property.

Types of analyses: De-identified data will be made available to other researchers, subject to approval of a formal data access request that includes a detailed description of the purpose/scientific rationale of the proposed project. Requests are reviewed by the SUCCESS study group Steering Committee and will be approved if the proposed projects have

a sound scientific or patient benefit rationale. Data recipients are required to sign a formal data sharing agreement which describes the conditions for release and requirements for data transfer, storage, archiving, publication and intellectual property.

Mechanisms of data availability: De-identified data will be made available to other researchers, subject to approval of a formal data access request that includes a detailed description of the purpose/scientific rationale of the proposed project. Requests are reviewed by the SUCCESS study group Steering Committee and will be approved if the proposed projects have a sound scientific or patient benefit rationale. Data recipients are required to sign a formal data sharing agreement which describes the conditions for release and requirements for data transfer, storage, archiving, publication and intellectual property.

Any additional restrictions: Data will be available beginning 9 months and ending 5 years following article publication.
