Supplemental Figure S2: Representative images **(A)** and quantification **(B)** of FDL tendon cell populations (Scx-lin+ [pink], Scx-GFP+ [green], Scx-lin+;Scx-GFP+ [yellow], negative [blue]) labeled by the *Scx;Ai9;GFP* mouse. White arrows indicate tendon cells that are Scx-GFP+ but not Scx-lin. Yellow arrows indicate cells that are neither Scx-lin+ nor Scx-GFP+ (negative cells). Scale bars = 50 μm (top row), 20 μm (bottom row). n=4.
