

**Fig.S2 Quantification of infiltrated cells in EAE spinal cords.**

**(a) Representative analysis of infiltrated cell counts in H&E stainings of EAE spinal cords (n=5 in each group).**

**(b) Representative analysis of CD4-positive cells in EAE spinal cords (n=5 in each group).**

**(c) Representative analysis of IBA1-positive cells in EAE spinal cords (n=5 in each group).**

**Data are represented as mean  $\pm$  SEM and were analyzed by the two-sided unpaired t test. \*\*\*\*, p < 0.0001.**
