Supplementary Table 1. Overall results of MuSK CBAs in patients with MG, other neuromuscular disorders, and healthy controls

Known diagnosis         Number of samples         Positive MuSK CBA         Percentage (%)           MG         177         34         19.2           LEMS         8         0         0           CIDP         17         0         0           Amyotrophic lateral sclerosis         3         0         0           Inflammatory myopathy         3         0         0           Healthy control         10         0         0	• • •			
LEMS     8     0     0       CIDP     17     0     0       Amyotrophic lateral sclerosis     3     0     0       Inflammatory myopathy     3     0     0	Known diagnosis	Number of samples	Positive MuSK CBA	Percentage (%)
CIDP 17 0 0 Amyotrophic lateral sclerosis 3 0 0 Inflammatory myopathy 3 0 0	MG	177	34	19.2
Amyotrophic lateral sclerosis 3 0 0 0 Inflammatory myopathy 3 0 0	LEMS	8	0	0
Inflammatory myopathy 3 0 0	CIDP	17	0	0
	Amyotrophic lateral sclerosis	3	0	0
Healthy control 10 0 0	Inflammatory myopathy	3	0	0
	Healthy control	10	0	0

CBA: cell-based assay, CIDP: chronic inflammatory demyelinating polyradiculoneuropathy, LEMS: Lambert-Eaton myasthenic syndrome, MG: myasthenia gravis, MuSK: Muscle-specific tyrosine kinase
