Note. Pearson product-moment correlations were calculated for the minor dimension Absorption of the Phenomenology of Consciousness Inventory (PCI; Pekala, 1991) in the 3 Hz FLS condition and the 10 Hz FLS condition with the personality traits Absorption, as assessed with the Tellegen Absorption Scale (TAS; Tellegen & Atkinson, 1974), and the Big Five personality traits, as assessed with the NEO-FFI-2 (Costa & McCrae, 1989).
