

Data Sharing Statement

Rahma. Use of Total Neoadjuvant Therapy for Locally Advanced Rectal Cancer. *JAMA Oncol*. Published July 01, 2021.
doi:10.1001/jamaoncol.2021.1683

Data

Data available: Yes

Data types: Deidentified participant data, Data dictionary

How to access data: Data Sharing Statement: The study protocol and informed consent form will be made available. Individual participant data that underlie the results reported in this article, after de-identification, will be available within one year after publication and will be accessible through the NCTN Data Archive. Data will be available to researchers who wish to analyze the data in secondary studies to enhance the public health benefit of the original work. Requirements may include (but not be limited to): a research plan, a Data Use Agreement (DUA), and legally binding signatures.

When available: beginning date: 06-01-2022

Supporting Documents

Document types: None

Additional Information

Who can access the data: Data will be available to researchers who wish to analyze the data in secondary studies to enhance the public health benefit of the original work.

Types of analyses: Secondary studies to enhance the public health benefit of the original work

Mechanisms of data availability: Requirements may include (but not be limited to): a research plan, a Data Use Agreement (DUA), and legally binding signatures.
