

Supplementary Fig. S7

Supplementary Fig. S7. Addition of AFM13 failed to induce apoptosis of Karpas 299 cells in the absence of NK cells. Karpas 299 cells were labelled with 100 $\mu\text{g/ml}$ of anti-AFM13 antibody at 37 $^{\circ}\text{C}$ and were either washed after 1 hr or left unwashed. The cells were then harvested and evaluated for viability using Live/Dead staining by flow cytometer. AFM13 alone failed to induce death of Karpas 299 cells.
