

SUPPLEMENTARY MATERIAL

**Figure S1:** NT-proBNP levels of PD patients at baseline, 3months, 6months and 12 months after initiating sacubitril-valsartan.

**Figure S2:** NYHA functional class of PD patients before and after initiating sacubitril-valsartan with observation period of 3-12 months.

**Figure S3:** Estimated GFR of PD patients before and after initiating sacubitril-valsartan with observation period of 3-12 months. The Wilcoxon matched-pair signed-rank (2 samples) tests was applied to compare self-matching data of eGFR.
