

Supplementary Table 1. Selection criteria of the subjects

Inclusion criteria	Exclusion criteria
Newly diagnosed with NS or a known case SSNS in a relapse (with a follow-up of at least 6 months)	SRNS with a known pathogenic mutation (patients will be screened for the common mutations in <i>NPHS2</i> and <i>WT1</i>)
SRNS	NS with multiple organ involvement or systemic features (e.g., syndromic child, SLE, vasculitis)
Post renal transplants with recurrence of NS.	Biopsy proven NS other than MCD and FSGS (e.g., Membranous nephropathy, membrano-proliferative glomerulonephritis, IgA nephropathy) NS with CKD stage II–V at time of screening Refusing consent

NS, nephrotic syndrome; SSNS, steroid-susceptible nephrotic syndrome; SRNS, steroid-resistant nephrotic syndrome; MCD, minimal-change disease; CKD, chronic kidney disease.
