

**Supplemental Table 1. Comparison of TUS-CPS (2014-2015), NHIS (2015), and PATH (2015-2016) methodology and current product use definitions**

	Tobacco Use Supplement to the Current Population Survey (TUS-CPS): 2014-2015	National Health Interview Survey (NHIS): 2015	Population Assessment of Tobacco & Health (PATH): Wave 3; 2015-2016
Sample size	163,073	33,672	28,148
Response rate (formula)	54.2% (percentage of self-respondents of all eligible survey sample)	Conditional response rate for the Sample Adult component: 79.7%, (calculated by dividing the number of completed Sample Adult interviews (33,672) by the total number of eligible sample adults (42,270)); Unconditional or final response rate for the Sample Adult component: 55.2% (calculated by multiplying the conditional rate of 79.7% by the final family response rate 69.3%)	78.4% (ratio of number of completed cases to number of cases eligible for Wave 3 interview among Wave 1 participants)
Sampling frame	National two-stage sampling design of civilian, noninstitutionalized U.S. population (supplement to the Current Population Survey)	National multistage, stratified, clustered sampling of civilian, noninstitutionalized U.S. population; Oversampled African American/Black, Hispanic, and Asian persons	National four-stage stratified area probability design of civilian, noninstitutionalized U.S. population; Oversampled tobacco users, young adults (aged 18-24), and African American/Black adults
Data collection method	Computer Assisted Telephone Interviewing (CATI) or Computer Assisted Personal Interviewing (CAPI)	Computer Assisted Personal Interviewing (CAPI) or Telephone Interviewing	Audio Computer-Assisted Self-Interviewing (ACASI)
Current product use definitions			
Cigarettes	Smoked ≥ 100 cigarettes in lifetime and now smoke cigarettes every day or some days		
ENDS	Now use an e-cigarette every day or some days [section includes the following language: The next question is about electronic or e-cigarettes. You may also know them as vape-pens, hookah-pens, e-hookahs, or e-vaporizers. Some look like cigarettes, and others look like pens or small pipes. These are battery-powered, usually contain liquid nicotine, and produce vapor instead of smoke.]		Now use electronic nicotine product [e-cigarettes, e-cigars, e-pipes, e-hookahs, something else] every day or some days

Traditional cigars	Now smoke a regular cigar, cigarillo, or little filtered cigar every day or some days		Now smoke traditional cigars every day or some days
Cigarillos			Now smoke cigarillos (with or without a tip) every day or some days
Filtered cigars			Now smoke filtered cigars every day or some days
Tobacco pipe	Now smoke a regular pipe filled with tobacco every day or some days	Now smoke a regular pipe, water pipe, or hookah every day or some days	Now smoke a pipe filled with tobacco every day or some days
Hookah	Now used a water pipe or hookah pipe filled with tobacco every day or some days		Now smoke hookah every day or some days
Smokeless tobacco (chew, dip, spit)	Now use smokeless tobacco such as moist snuff, dip, spit, chew tobacco, or snus every day or some days	Now use smokeless tobacco products every day or some days [section includes the following language: Smokeless tobacco products are placed in the mouth or nose and can include chewing tobacco, snuff, dip, snus (SNOOSE), or dissolvable tobacco.]	Now use smokeless tobacco every day or some days [section includes the following language: The next questions ask about other types of smokeless tobacco products which you put in your mouth and chew, suck or spit. There are many types of smokeless tobacco products such as loose snus, moist snuff, dip, spit, and chewing tobacco. Common brands include Redman, Levi Garrett, Beechnut, Skoal, Grizzly, Copenhagen, and Kodiak, but there are many others.]
Snus	Now use dissolvable tobacco every day or some days		Now use snus pouches every day or some days
Dissolvable tobacco			Not available
Other combustible category	Used any of the following products according to the definitions listed above: Traditional cigars, cigarillos, filtered cigars, tobacco pipe, hookah		

Smokeless category	Used any of the following products according to the definitions listed above: moist snuff, dip, spit, chew, snus, dissolvable tobacco	Used any of the following products according to the definitions listed above: chew, snuff, dip, snus, dissolvable tobacco	Used any of the following products according to the definitions listed above: loose snus, moist snuff, dip, spit, chew, snus pouches
--------------------	---	---	--

All definitions use established use criteria (100+ lifetime cigarettes) to define current cigarette smokers

Due to variations in skip patterns across surveys, all respondents who reported using a product every day were coded as using that product on 30 out of 30 days and all respondents who reported using a product not at all were coded as using that product on 0 out of 30 days

\*pipes defined as every day some day across definitions
