Dear Dr. Zong, I am very impressed with your revised manuscript that shows a novel, redox regulatory role for TRIM21. I thank you for including me as a co-author of the paper. I have made a few editorial changes in the manuscript, as attached (no substantive change).

I hope your final revision will be promptly accepted.

Keiko Ozato

Subject: Fwd: Editor's Decision on MOLECULAR-CELL-D-15-01545R1

Dear Dr. Ozato,

Our paper on p62 ubiquitylation is near acceptance at Mol Cell. I will soon submit a revision after addressing Reviewer 1's remaining concerns, and editing the ms to conform to the journal guideline. Please take this chance to look at the ms to see whether you have important edits (especially author names and affiliations) to make. Please note that we are already way over the journal limit for word counts so can only accommodate essential changes.

All the best!

Wei-Xing
