

**Fig. S7 Pairwise comparison illustrates that host species dominates over geographical site in governing honeybee gut bacterial communities by the analyses of non-metric multidimensional scaling (NMDS), permutational multivariate analysis of variance (PERMANOVA), and variance partition analysis (VPA). \*\*\*:  $P < 0.001$ ; \*\*:  $P < 0.01$ ; \*:  $P < 0.05$ ; ns:  $P > 0.05$ .  $P$  values were adjusted with BH (Benjamini & Hochberg) method (1).**
