

Supplemental Tables for:

Analysis of real-world data to investigate the impact of race and ethnicity on response to PD-1 and PD-L1 inhibitors in advanced NSCLC

Kristin Ayers et al.

Table S1. Cohort Follow Up Descriptive Statistics.

n=249	TTD	OS
Events (%)	142 (57.0)	91 (36.5)
<i>Died on anti PD1/PD-L1 Therapy</i>	63 (44.4)	63 (69.2)
<i>Lost to follow up after/before event*</i>	33 (23.2)	9 (9.9)
Censored (%)	107 (43.0)	158 (63.5)
<i>Censored at end of study (complete follow up)</i>	50 (46.7)	81 (51.3)
<i>Drop-out (left study before event)</i>	57 (53.3)	77 (48.7)
<i>Censored on anti PD1/PD-L1 Therapy</i>	107 (100)	99 (62.7)
<i>Censored Drop-out on anti PD1/PD-L1 Therapy</i>	57 (53.3)	47 (29.7)
<i>Censored Drop-out and likely entered Hospice</i>	21 (19.6)	31 (19.6)
TTD/OS time (including censored) >6 months	78 (31.3)	140 (56.2)
TTD/OS time (including censored) >1 year	41 (16.5)	75 (30.1)
Only one treatment (TTD=1)	40 (16.1)	

NOTE: Percentages for indented categories are based on the total number within the corresponding boldface group. *Either 1) had treatment discontinuation but were lost to follow up before the end of study or death, or 2) died but did not have a hospital visit within 120 days of death.
