

Figure S1. Cell-transfected efficiency is detected by RT-qPCR. (A) MALAT1 expression was detected by RT-qPCR in the transfected MCF-7 cells and MDA-MB-231 cells. (B) MiR-26a expression was detected by RT-qPCR in the transfected MCF-7 cells and MDA-MB-231 cells. (C) MiR-26b expression was detected by RT-qPCR in the transfected MCF-7 cells and MDA-MB-231 cells. \*P<0.05. MALAT1, metastasis-associated lung adenocarcinoma transcript 1; miR, microRNA; RT-qPCR, reverse transcription-quantitative PCR; si, small interfering; SCR, scrambled..
