Supplemental Material

Health Effects of Naphthalene Exposure: A Systematic Evidence Map and Analysis of Potential Considerations for Dose–Response Evaluation

Erin E. Yost, Audrey Galizia, Dustin F. Kapraun, Amanda S. Persad, Suryanarayana V. Vulimiri, Michelle Angrish, Janice S. Lee, and Ingrid L. Druwe

Table of Contents

Survey of existing reference values for naphthalene

Table S1. Sources searched for naphthalene health effect reference values.

Literature search and screening

Table S2. Database search strategy.

Table S3. Processes used to augment the search of core databases for naphthalene.

Table S4. Electronic screening inclusion terms for naphthalene (listed alphabetically by organ/health system).

Study evaluation methods

Table S5. Questions to guide the development of criteria for each domain in epidemiology studies.

Table S6. Information relevant to evaluation domains for epidemiology studies.

Table S7. Questions to guide the development of criteria for each domain in experimental animal toxicology studies.

Epidemiology studies reporting on other health systems

Table S8. Summary of eight human studies that did not report any of the health systems selected for further evaluation. These studies did not undergo study evaluation.

Appendix: Reference Values Identified for Naphthalene

Table A1. Details on derivation of the available health effect reference values for inhalation exposure to naphthalene (from Figure 1 of the main text) (continued on following pages).

Table A2. Details on derivation of the available health effect reference values for oral exposure to naphthalene (from Figure 2 of the main text).

Table A3. Details on additional inhalation values based on another agency's values or lacking derivation descriptions (continued on following pages).
