<sup>a</sup>Reference for the dependent variable of race is 'White' for each of the racial/ethnic group comparisons.

<sup>b</sup>All unadjusted models included race and one independent variable.

<sup>c</sup>All adjusted models included race and one independent variable, while adjusting for age, education, income, and type of residential community.

<sup>d</sup>Zero 'Checked' responses for 'Homeschooling children' for American Indian or Alaskan Native respondents.

<sup>e</sup>Zero 'Unchecked' responses for 'Washing hands with soap' for Latinx respondents.
