

Supplementary Table 1 Important protocol deviations

Protocol deviation	Patients*, n
Entrance criteria not met	
Efficacy-related entrance criteria not met	4
Patient did not have trial diagnosis or was not part of target population	1
Patient had a condition that may have caused additional risk from trial medication	1
Trial medication and randomization	
Delayed BI 836826 administration	3
Delayed GemOx administration	1
Concomitant medication	
Prohibited medication	1

*Three patients were identified with more than 1 protocol deviation: 1) did not have a CT scan with involvement of at least 1 bi-dimensional lesion/node >1.5 cm and delayed administration of BI 836826 in Cycle 1; 2) prior history of malignancy other than DLBCL and took prednisone for lymphoma, which was prohibited by the CTP; 3) HBV infection at the start of treatment, GemOx infusion on Day 2 instead of Day 1 of Cycle 1, and BI 836826 administration delayed in Cycle 1
