Figure S2. Network maps for networks of interest (top) and corresponding rWML correlation t-maps (bottom). (A) Auditory-salience-language network, (B) Default mode network, (C) Left frontoparietal network, (D) Posterior default mode network, (E) Dorsal frontal network. For the correlation t-maps (bottom row), shades of red/orange indicate positive regions of correlation, and shades of blue indicate negative regions of correlation.
