Abbreviations: ADL, activities of daily living; BP, blood pressure; CASI, Cognitive Abilities Screening Instrument; N, number; SE, standard error; WMH, white matter hyperintensities; y, year

\* Mean±SE from linear mixed models adjusted for age, sex and race. Between-group difference is mean (95% confidence interval) difference in change/year for lower vs. higher BP treatment target.

\*\* Calculated from a two-way interaction (treatment group x time) and a three-way interaction (treatment group x effect modifier x time), using linear mixed model adjusted for age, sex and race.

\*\*\* WMH was missing for 27 participants (9 in lower BP target group, 18 in higher BP target group).

Abbreviations: ADL, activities of daily living; BP, blood pressure; CASI, Cognitive Abilities Screening Instrument; N, number; SE, standard error; WMH, white matter hyperintensities; y, year

\* Mean±SE from linear mixed models adjusted for age, sex and race (and for history of diabetes, history of ischemic disease, and baseline diastolic blood pressure in the analysis adjusting for baseline imbalances). Between-group difference is mean (95% confidence interval) difference in change/year for lower vs. higher BP treatment target.

\*\* Calculated from a two-way interaction (treatment group x time) and a three-way interaction (treatment group x effect modifier x time), using a linear mixed model.

\*\*\* Non-hypertensive participants without antihypertensive medication at baseline excluded.

\*\*\*\* Analysis was adjusted for age, sex, race, history of diabetes, history of ischemic disease, and baseline diastolic blood pressure.
