### *Identification of Journals*

Journals in psychiatry and neuroscience were identified in Winter 2019 using [SCImago](#), a publicly available database that includes journal rankings and country scientific indicators developed from the information contained in the Scopus® database (Elsevier B.V.). First, we identified journals in the United States using subject areas filters “Medicine” and “Neuroscience”, regions/countries filter “United States”, and the following subject categories filters: psychiatry and mental health, biological psychiatry, psychiatric mental health, cognitive neuroscience, behavioral neuroscience, cellular and molecular neuroscience, developmental neuroscience and neuroscience (miscellaneous). Second, we identified international journals using subject areas filters “Medicine” and “Neuroscience”, regions/countries filter “United States”, and the following subject categories filters: psychiatry and mental health, biological psychiatry, psychiatric mental health, cognitive neuroscience, behavioral neuroscience, cellular and molecular neuroscience, developmental neuroscience and neuroscience (miscellaneous). The resulting list of journals was then screened based on the description provided on SCImago; any journals not in the psychiatry, mental health, or neuroscience topic areas were screened out. If descriptions were unclear, we consulted the journal’s website. International journals with impact factors less than 5 were excluded. Editors-in-chief were identified via the journal’s home website. In the case of multiple Editor’s-in-chief, all identified individuals were included in the survey mailing list. A total of 172 Editors-in-Chief at 151 journals were identified (see list below).

### *Survey Distribution*

The survey was sent to the 172 identified Editors-in-Chief and distributed to a variety of email listservs associated with psychiatric and neuroscience research organizations. See below for a list of the email listservs and estimated number of members per organization. To protect respondent identity, the Qualtrics survey was designed to collect anonymous responses, thus preventing analysis of the proportion of respondents from each recruitment source. Multiple responses from the same IP address were prevented using the “prevent multiple responses” setting in Qualtrics survey setup. Data cleaning procedures also included examination of IP addresses, response start/end times, and response patterns. To the best of our ability, data reflect responses from unique individuals.

## List of Psychiatry & Neuroscience Journals included in survey mailing

<b>Journals</b>	<b>SCImago Subject Category</b>
Academic Psychiatry	Psychiatry and Mental Health
ACS Chemical Neuroscience	Cognitive Neuroscience
Acta neuropathologica	Cellular and Molecular Neuroscience
Acta neuropathologica Communications	Cellular and Molecular Neuroscience
Acupuncture and Electro-Therapeutics Research	Neuroscience (miscellaneous)
Advances in Neurobiology	Cellular and Molecular Neuroscience
AIMS Neuroscience	Neuroscience (miscellaneous)
AJOB Neuroscience	Neuroscience (miscellaneous)
Alzheimer's and Dementia	Psychiatry and Mental Health
Alzheimer's and Dementia: Diagnosis, Assessment and Disease Monitoring	Psychiatry and Mental Health
American Journal of Medical Genetics, Part B, Neuropsychiatric Genetics	Psychiatry and Mental Health
American Journal of Alzheimer's Disease and other Dementias	Psychiatry and Mental Health
American Journal of Geriatric Psychiatry	Psychiatry and Mental Health
American Journal of Orthopsychiatry	Psychiatry and Mental Health
American Journal of Psychiatry	Psychiatry and Mental Health
American Journal on Addictions	Psychiatry and Mental Health
Annals of Clinical Psychiatry	Psychiatry and Mental Health
Annals of the New York Academy of Sciences	Neuroscience (miscellaneous)
Annual Review of Neuroscience	Neuroscience (miscellaneous)
Autism Research	Neuroscience (miscellaneous)
Behavioral Sleep Medicine	Neuroscience (miscellaneous)
Biological Psychiatry	Biological Psychiatry
Biological Psychiatry: Cognitive Neuroscience and neuroimaging	Biological Psychiatry
Brain and Cognition	Cognitive Neuroscience
Brain and Language	Cognitive Neuroscience
Brain Connectivity	Neuroscience (miscellaneous)
Brain Imaging and Behavior	Cognitive Neuroscience
Brain Pathology	Neuroscience (miscellaneous)
Brain Stimulation	Neuroscience (miscellaneous)
Brain, Behavior, and Immunity	Behavioral Neuroscience
British Journal of Developmental Psychology	Developmental Neuroscience
British Journal of Psychiatry	Psychiatry and Mental Health
Cellular and Molecular Life Sciences	Cellular and Molecular Neuroscience
Cellular and Molecular Neurobiology	Cellular and Molecular Neuroscience
Cerebral Cortex	Cognitive Neuroscience
Chemosensory Perception	Cellular and Molecular Neuroscience
Child Psychiatry and Human Development	Psychiatry and Mental Health
Clinical and Translational Science	Neuroscience (miscellaneous)
Clinical Schizophrenia and Related Psychoses	Psychiatry and Mental Health
