The final column reflects overall group differences between menopausal status covariates of body mass index (BMI, kg/m<sup>2</sup>), smoking intensity (pack·year), alcohol consumption amount (g/day), hypertension diabetes mellitus, occupation with\*\* or without\* baseline age.

N, number of observations; PSQI, The Pittsburgh sleep quality index; HSE, habitual sleep efficiency; MSFsc, mid-sleep on free days corrected for sleep debt on workdays; free days (F)/workdays (W).
