

Description of Additional Supplementary Files

File name: Supplementary data 1

Description: Source data.

File name: Supplementary video 1

Description: Representative brightfield video files of beating human embryonic stem cell-derived cardiomyocytes (hESC-CMs) following infection with 25 μ L of SARS-CoV-2 spike pseudotyped lentivirus.

File name: Supplementary video 2

Description: Representative brightfield video files of beating human embryonic stem cell-derived cardiomyocytes (hESC-CMs) following infection with 50 μ L of SARS-CoV-2 spike pseudotyped lentivirus.

File name: Supplementary video 3

Description: Representative brightfield video files of beating human embryonic stem cell-derived cardiomyocytes (hESC-CMs) following infection with 100 μ L of SARS-CoV-2 spike pseudotyped lentivirus.

File name: Supplementary video 4

Description: Representative brightfield video files of beating human embryonic stem cell-derived cardiomyocytes (hESC-CMs). Control cells were treated with 100 μ L vesicular stomatitis virus (VSV-G) pseudotyped lentivirus.

File name: Supplementary video 5

Description: Representative brightfield video files of beating human embryonic stem cell-derived cardiomyocytes (hESC-CMs). Control cells left untreated with viral particles.
