

Supplemental_Fig_S9. Confirmation of R-loops in maize centromere by CENH3-ChIP+S9.6 dot blot.

(A) About 20 ng of CENH3-ChIP DNA was labeled as a FISH probe. Strong signals were detected in centromeres, indicating a well-performed CENH3-ChIP. (B) Diagram of the CENH3-ChIP+S9.6 dot blot and two replicates were conducted.
