Molecular characteristics and spatial distribution of adult human corneal cell subtypes

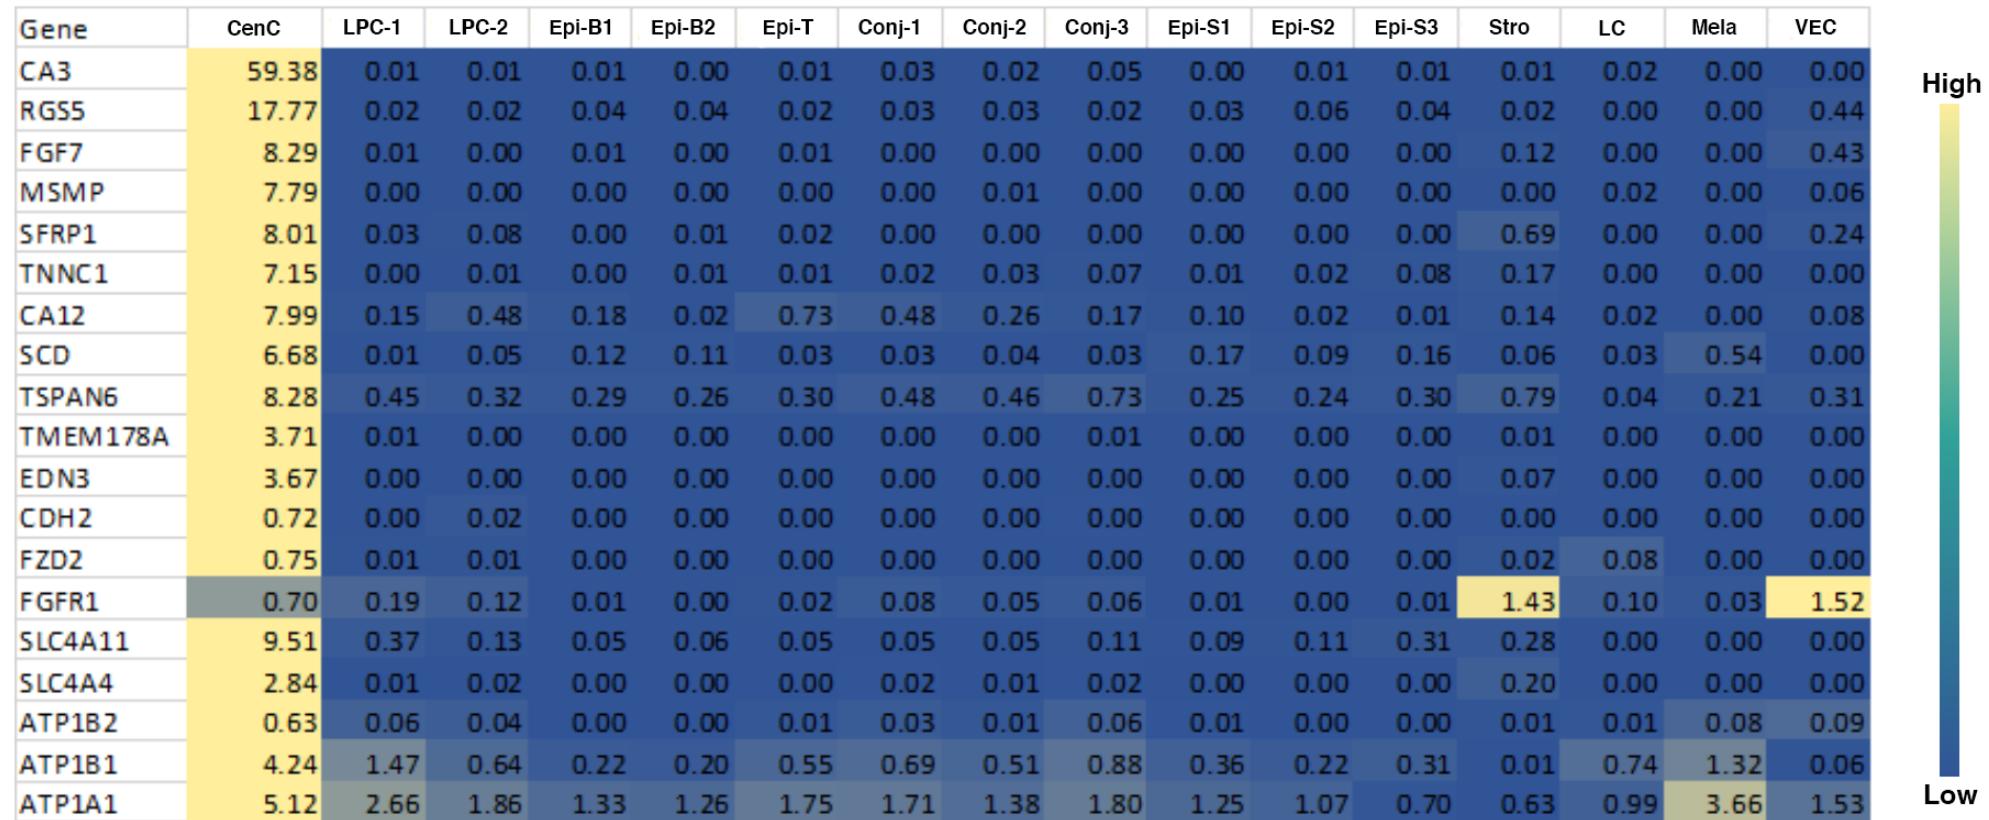

Ann J Ligocki, Wen Fury, Christian Gutierrez, Christina Adler, Tao Yang, Min Ni, Yu Bai, Yi Wei, Guillermo L Lehmann, Carmelo Romano

Supplementary Figure 1.

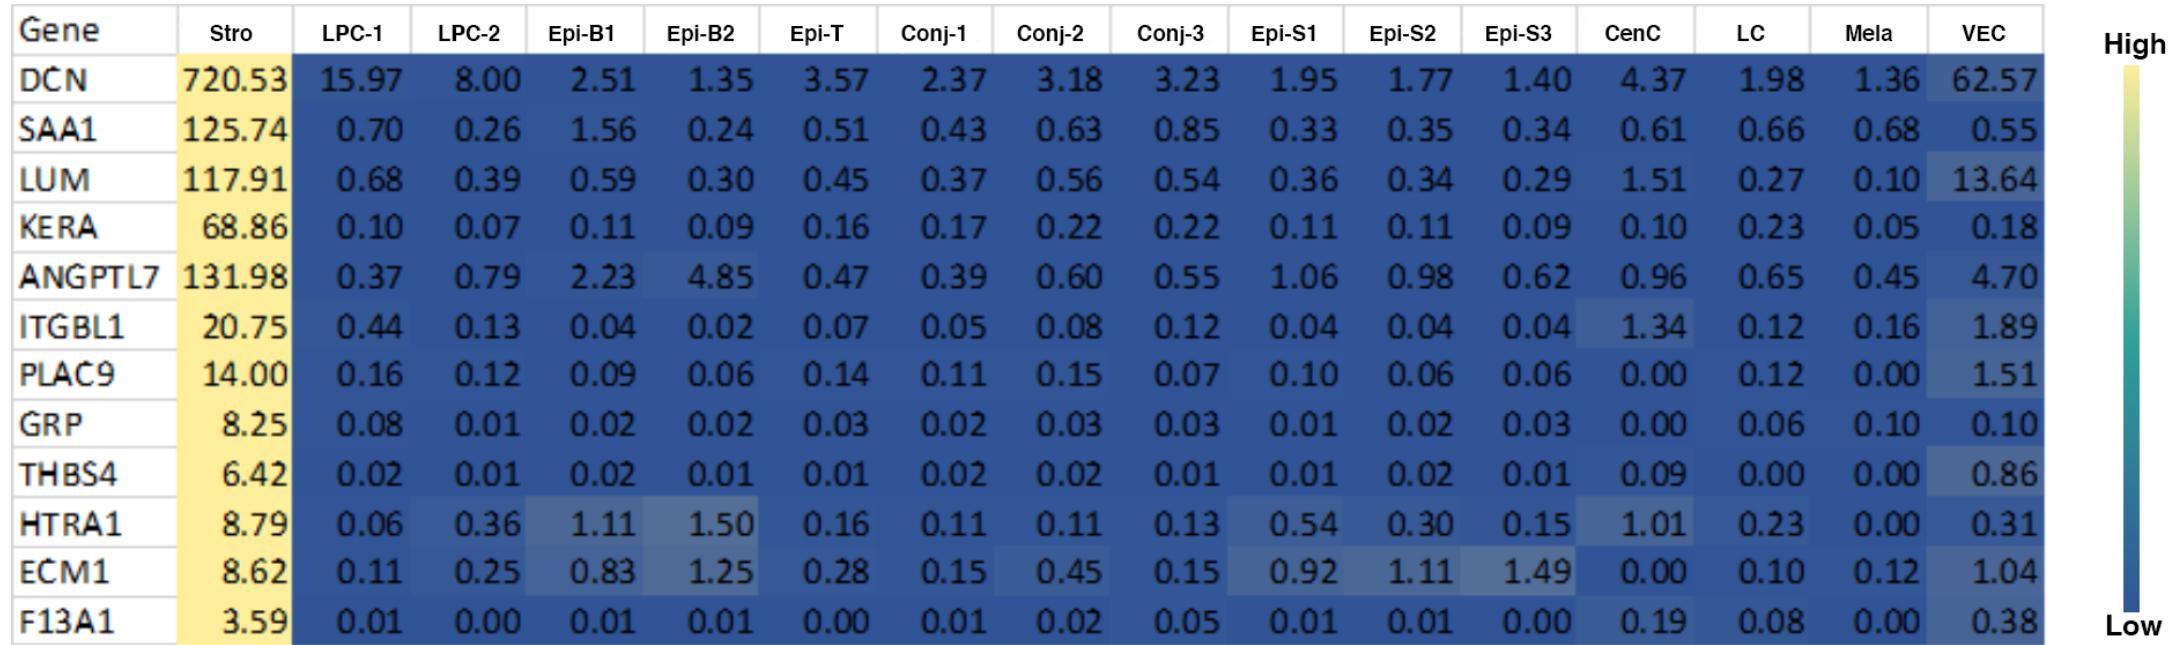

Supplementary Figure 1. Heatmap of cluster marker gene expression. This heatmap corresponds to the stacked violin plot in Figure 1. The genes are the marker genes of each cluster. The value in each cell is the average of normalized UMI of each gene in each cluster and the color is based on the range of values in each row.

Supplementary Figure 2.

Supplementary Figure 2. Heatmap of cornea endothelial cluster marker gene expression across all clusters. This heatmap corresponds to the stacked violin plot in Figure 2. The value in each cell is the average of normalized UMI of each gene in each cluster and the color is based on the range of values in each row.

Supplementary Figure 3.

Supplementary Figure 3. Heatmap of stromal cluster marker gene expression across all clusters. This heatmap corresponds to the stacked violin plot in Figure 3. The value in each cell is the average of normalized UMI of each gene in each cluster and the color is based on the range of values in each row.

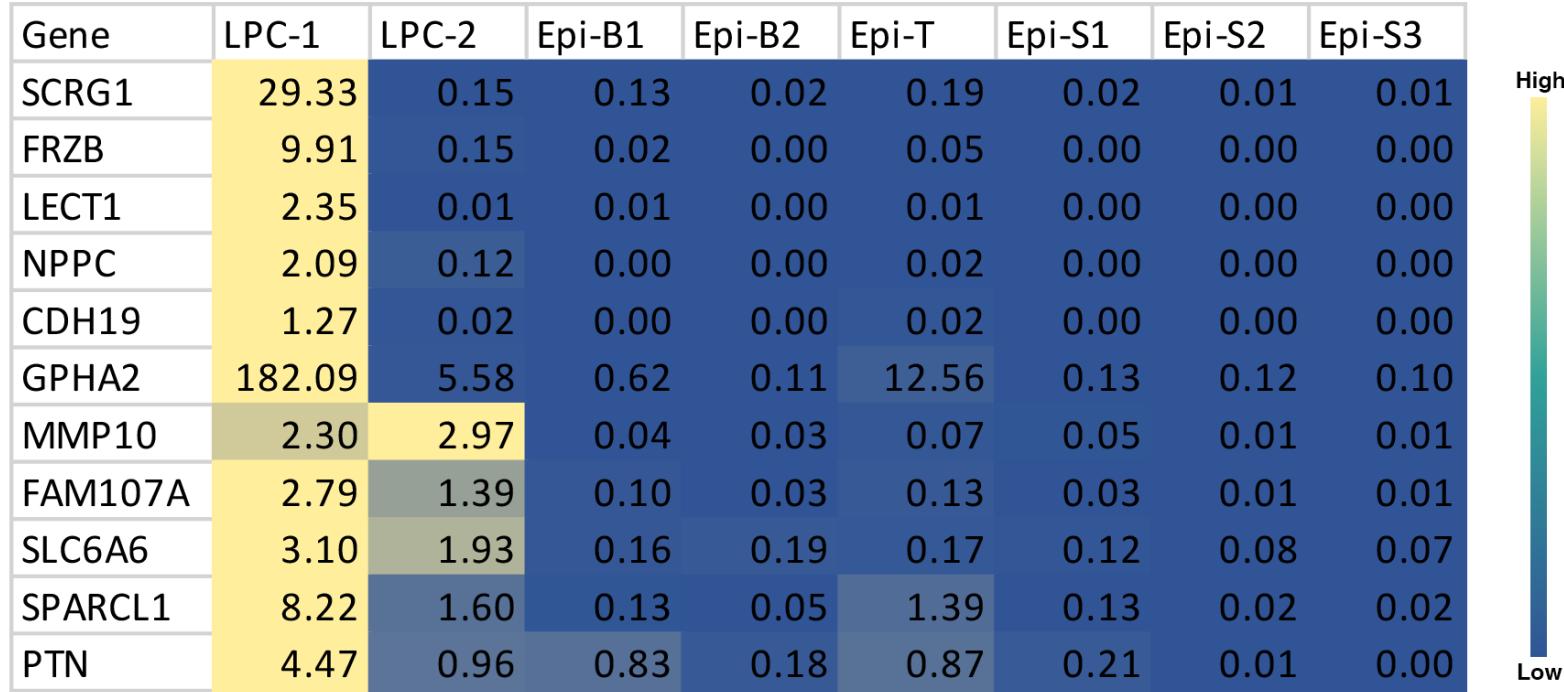

Supplementary Figure 4.

Supplementary Figure 4. Heatmap of epithelial cluster marker gene expression across epithelial clusters. This heatmap corresponds to the stacked violin plot in Figure 4. The value in each cell is the average of normalized UMI of each gene in each cluster and the color is based on the range of values in each row.

Supplementary Figure 5.

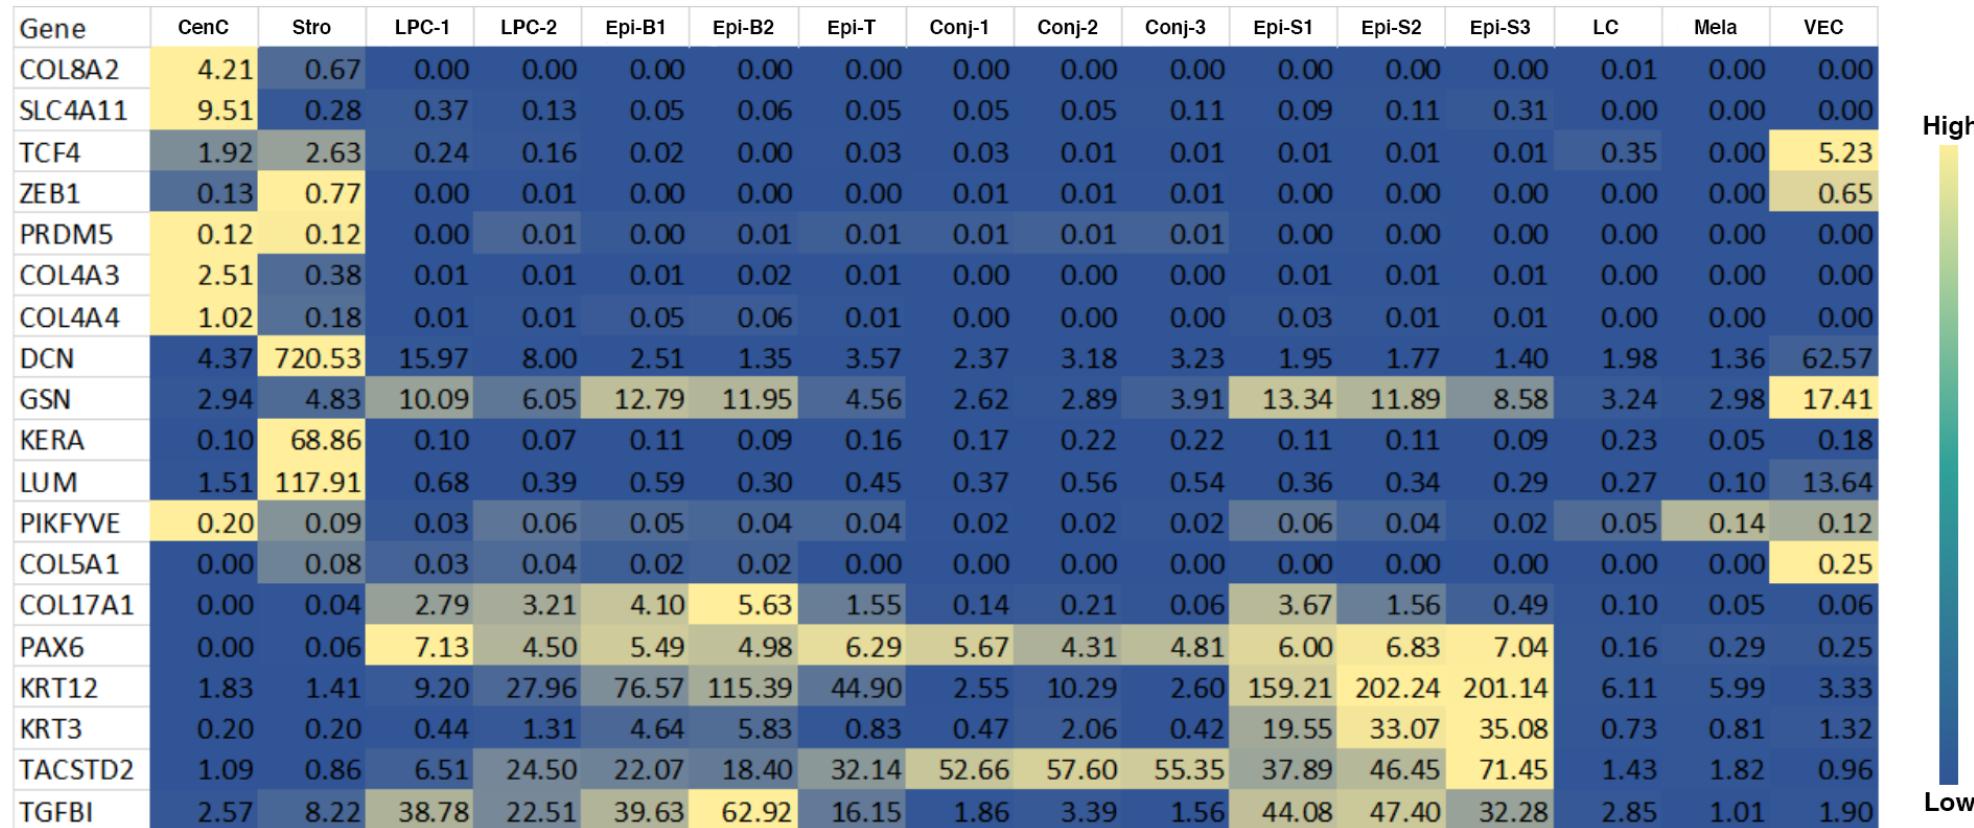

Supplementary Figure 5. Heatmap of limbal epithelial stem cell cluster marker gene expression across all cornea epithelial clusters. This heatmap corresponds to the stacked violin plot in Figure 5. The value in each cell is the average of normalized UMI of each gene in each cluster and the color is based on the range of values in each row.

Supplementary Figure 6.

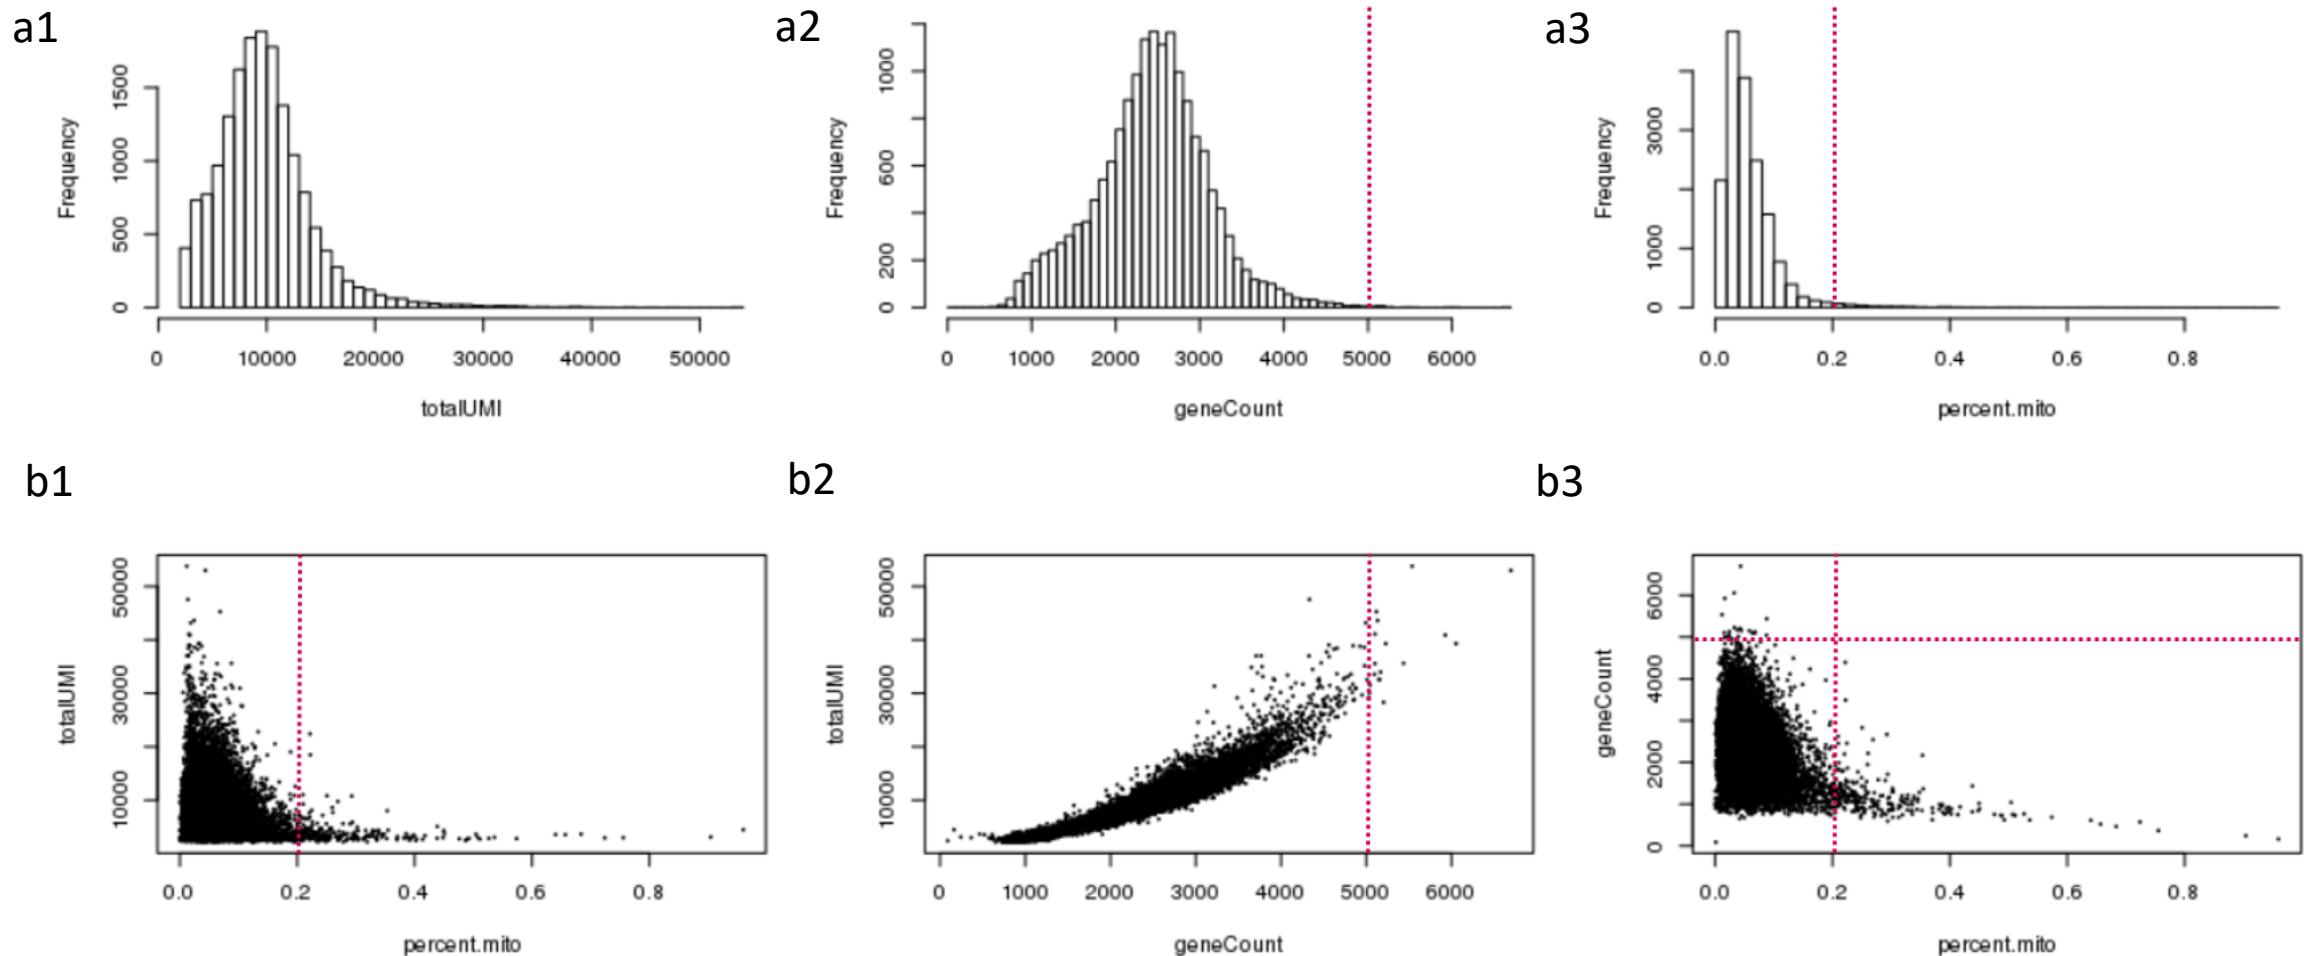

Supplementary Figure 6. NextBio correlation analysis suggesting Conj-1, 2 and 3 as conjunctiva epithelial cells. Genes significantly differentially expressed in Conj-1, 2 and 3 vs. Epi-S1, 2 and 3 comparison (GL1) was used as input for NextBio correlation analysis (BaseSpace Correlation Engine) of their curated studies. The topmost correlated gene list was generated from cornea vs. conjunctiva epithelial cell comparison (GL2) (Ramierz-Miranda et al, 2011; Mol Vis 17:1652-1661). A. Overall overlap between the 2 gene lists and associated p value. B. Overlap among gene subsets and associated p value.

Supplementary Figure 7.

Supplementary Figure 7. Heatmap of the expression of cornea disease-related genes across all clusters. This heatmap corresponds to the stacked violin plot in Figure 7. The value in each cell is the average of normalized UMI of each gene in each cluster and the color is based on the range of values in each row.

Supplementary Figure 8.

Supplementary Figure 8. Cell filtering based on QC. **a(1-3),** Histogram of total UMI, number of genes detected or mitochondrial to total read count ratio across all cells, respectively. **b(1-3),** Scatter plots of QC parameters. Red lines are the QC filtering criteria: cells that have less than 5000 genes detected and less than 20% mitochondria reads are kept for further analysis.

Molecular characteristics and spatial distribution of adult human corneal cell subtypes

Ann J Ligocki, Wen Fury, Christian Gutierrez, Christina Adler, Tao Yang, Min Ni, Yu Bai, Yi Wei
, Guillermo L Lehmann, Carmelo Romano

Supplementary Table 1. Gene expression values of cell cluster markers

p_val: p value

avg_LogFC: natural log transformed average UMI ratio between the cells of the specified cluster
(column G) and the cells outside the cluster

pct.1: percentage of cells in the specific cluster (column G) that the expression of a gene is detected

pct.2: percentage of cells outside the specified cluster that the expression of a gene is detected

p_val_adj: multiple test adjusted p value

cluster: the cluster for which the corresponding gene in the same row is a marker for

gene	p_val	avg_logFC	pct.1	pct.2	p_val_adj	cluster
