

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: **List of differentially expressed genes in BICR6 cells treated with 3p-hpRNA or HU+ATRI.** log₂(fold change) and p-value (-log₁₀) are indicated for each listed genes after indicated treatment. Colored p-values indicate genes with log₂(fold change) >2. P-values were calculated for associated logistic regressions between gene expression levels and treatment condition using DESeq2 and P-values of genes expressed after both treatments are colored in red.
