

Supplementary Table 1. Scoring system used to evaluate the extent of Zika virus antigen immunostaining in mouse brain.

Score	Definition
Grade 0	No or very weak staining.
Grade 1	Weak staining partially covering the analyzed region.
Grade 2	Moderate staining covering partially or almost entirely the analyzed region; weak staining covering entirely the analyzed region.
Grade 3	Moderate staining covering almost entirely or entirely the analyzed region or intense staining partially covering the analyzed region.
Grade 4	Intense staining covering almost entirely the analyzed region or moderate to intense staining covering entirely the analyzed region.
Grade 5	Intense staining covering entirely the analyzed region.
