

Supplemental Figure 1 – P21 qPCR

Supplemental Figure 2 – Cerebellum and PFC

1 **SUPPLEMENTAL FIGURE LEGENDS**

2 **Supplemental Figure 1. Limited evidence of immune activation at P21 in EPEC-infected**
3 **mice.** Relative mRNA expression in ileum, colon, and hippocampus at P21. (N=12-16 mice per
4 group; *p≤0.05 by Student's T test (\pm Welch's correction), or Mann-Whitney where appropriate).

5 **Supplemental Figure 2. Limited evidence of immune activation in the cerebellum and pre-**
6 **frontal cortex region in EPEC-infected mice in adulthood.** Relative mRNA expression in
7 cerebellum and pre-frontal cortex in adult mice. (N=8 mice per group; *p≤0.05 by Student's T
8 test (\pm Welch's correction), or Mann-Whitney where appropriate).
