

Appendix Figure 1. Sample size Calculation*

Parameters	Minimum sample size required (shrinkage of 0.9 and 25% prevalence)	
	Cox-Snell R ² : 0.15	Cox-Snell R ² : 0.20
10	549	398
15	823	597
20	1,097	796
25	1,372	995
30	1,646	1,194
35	1,920	1,393
40	2,194	1,592

To estimate a 30-parameter logistic model with a shrinkage of 0.9, a prevalence of events of 25% and assuming a Cox-Snell R² of 0.15, 1,646 individuals would be needed, approximately 14 events per variable. In our study, the estimated models were carried out with much higher sample size and 30 parameters were never exceeded, despite the categorization of some independent variables such as age.

*Riley RD, Ensor J, Snell KIE, Harrell FE, Jr., Martin GP, Reitsma JB, et al. Calculating the sample size required for developing a clinical prediction model. BMJ. 2020;368:m441. doi: 10.1136/bmj.m441.

Appendix Figure 2. Kaplan-Meier survival plots with 95% confidence intervals for the different 30-day mortality risk categories according to the simplified score in the derivation and validation cohorts.

We considered the risk of 30-day mortality as low with 0-2 points, moderate with 3-5, high with 6-8, and very high with 9-30.

Appendix Table 1. TRIPOD Checklist: Prediction Model Development and Validation

Section/Topic	Item	Checklist Item			Page
Title and abstract					
Title	1	D;V	Identify the study as developing and/or validating a multivariable prediction model, the target population, and the outcome to be predicted.	Title.	
Abstract	2	D;V	Provide a summary of objectives, study design, setting, participants, sample size, predictors, outcome, statistical analysis, results, and conclusions.	Abstract.	
Introduction					
Background and objectives	3a	D;V	Explain the medical context (including whether diagnostic or prognostic) and rationale for developing or validating the multivariable prediction model, including references to existing models.	Introduction paragraphs 1 to 3.	
	3b	D;V	Specify the objectives, including whether the study describes the development or validation of the model or both.	Introduction paragraph 4.	
Methods					
Source of data	4a	D;V	Describe the study design or source of data (e.g., randomized trial, cohort, or registry data), separately for the development and validation data sets, if applicable.	Methods section. Source of data epigraph.	
	4b	D;V	Specify the key study dates, including start of accrual; end of accrual; and, if applicable, end of follow-up.	Methods section. Source of data epigraph.	
Participants	5a	D;V	Specify key elements of the study setting (e.g., primary care, secondary care, general population) including number and location of centres.	Methods section. Participants epigraph.	
	5b	D;V	Describe eligibility criteria for participants.	Methods section. Participants epigraph.	
Outcome	5c	D;V	Give details of treatments received, if relevant.	Results section. Participants epigraph.	
	6a	D;V	Clearly define the outcome that is predicted by the prediction model, including how and when assessed.	Methods section. Outcome epigraph.	
Predictors	6b	D;V	Report any actions to blind assessment of the outcome to be predicted.	Non-applicable.	
	7a	D;V	Clearly define all predictors used in developing the multivariable prediction model, including how and when they were measured.	Methods section. Predictors epigraph.	
Sample size	7b	D;V	Report any actions to blind assessment of predictors for the outcome and other predictors.	Non-applicable.	
	8	D;V	Explain how the study size was arrived at.	Methods section. Statistical analysis epigraph.	
Missing data	9	D;V	Describe how missing data were handled (e.g., complete-case analysis, single imputation, multiple imputation) with details of any imputation method.	Methods section. Statistical analysis epigraph.	
Statistical analysis methods	10a	D	Describe how predictors were handled in the analyses.	Methods section. Statistical analysis epigraph.	
	10b	D	Specify type of model, all model-building procedures (including any predictor selection), and method for internal validation.	Methods section. Statistical analysis epigraph.	
	10c	V	For validation, describe how the predictions were calculated.	Non-applicable.	
	10d	D;V	Specify all measures used to assess model performance and, if relevant, to compare multiple models.	Methods section. Statistical analysis epigraph.	
	10e	V	Describe any model updating (e.g., recalibration) arising from the validation, if done.	Non-applicable.	
Risk groups	11	D;V	Provide details on how risk groups were created, if done.	Methods section. Statistical analysis epigraph.	
Development vs. validation	12	V	For validation, identify any differences from the development data in setting, eligibility criteria, outcome, and predictors.	Results section. Participants epigraph.	
Results					

Participants	13a	D;V	Describe the flow of participants through the study, including the number of participants with and without the outcome and, if applicable, a summary of the follow-up time. A diagram may be helpful.	Results. Participants epigraph.
	13b	D;V	Describe the characteristics of the participants (basic demographics, clinical features, available predictors), including the number of participants with missing data for predictors and outcome.	Results. Participants epigraph. Table 1.
	13c	V	For validation, show a comparison with the development data of the distribution of important variables (demographics, predictors and outcome).	Results. Participants epigraph. Table 1.
Model development	14a	D	Specify the number of participants and outcome events in each analysis.	Results. Model development and performance epigraph. Table 2.
	14b	D	If done, report the unadjusted association between each candidate predictor and outcome.	Results. Model development epigraph. Table 3.
Model specification	15a	D	Present the full prediction model to allow predictions for individuals (i.e., all regression coefficients, and model intercept or baseline survival at a given time point).	Results. Model development and Simplified score development epigraphs. Tables 3 and 5.
	15b	D	Explain how to use the prediction model.	Results. Model development and Simplified score development epigraphs. Table 5 and Figure 1.
Model performance	16	D;V	Report performance measures (with CIs) for the prediction model.	Results. Model development and Simplified score development epigraphs. Appendix Table 2.
Model-updating	17	V	If done, report the results from any model updating (i.e., model specification, model performance).	Non-applicable
Discussion				
Limitations	18	D;V	Discuss any limitations of the study (such as nonrepresentative sample, few events per predictor, missing data).	Discussion. Paragraph n° 4.
Interpretation	19a	V	For validation, discuss the results with reference to performance in the development data, and any other validation data.	Non-applicable.
	19b	D;V	Give an overall interpretation of the results, considering objectives, limitations, results from similar studies, and other relevant evidence.	Discussion. Paragraphs n° 1 - 3.
Implications	20	D;V	Discuss the potential clinical use of the model and implications for future research.	Discussion. Paragraphs n° 5.
Other information				
Supplementary information	21	D;V	Provide information about the availability of supplementary resources, such as study protocol, Web calculator, and data sets.	Methods section. Source of data epigraph. ClinicalTrials.gov (NCT04355871). European Union Electronic Register of Post-Authorization Studies (EUPAS34331). References section. References number 24 and 25
Funding	22	D;V	Give the source of funding and the role of the funders for the present study.	Title page and Abstract.

*Items relevant only to the development of a prediction model are denoted by D, items relating solely to a validation of a prediction model are denoted by V, and items relating to both are denoted D;V. We recommend using the TRIPOD Checklist in conjunction with the TRIPOD Explanation and Elaboration document.

Appendix Table 2. Performance of the final prediction model and the simplified score.

	Nº Participants	AUROC	95% CI

Radiology Department: M Martí de Gracia, L Parra Gordo, A Diez Tascón, S Ossaba Vélez, I Pinilla, E Cuesta, M Fernández- Velilla, M Torres, G Garzón.

Preventive Medicine Department: V Pérez, A Quintás, I San Juan, J Cantero, C Pérez, M Castro, L Hernández, T Pedraz, E Fernández, C García, A Robustillo.

Emergency Medicine Department: I Fernández, M Noguerol, A Martínez, M González, R Cabrera, R Mayayo, R Marín, V Lo-Iacono, M Lerín, P Romero, B Reche, R Tejada, M Rico, R Deza, S Fabra, I Arroyo, L Dani, L Labajo, R Soriano, L López, E Calvin, S Martínez, L López-Tappero, M Pilares, O González, G Bejarano, A Iglesias, Y Tung, C Maroun, R Bravo, M Silvestre, F Perdomo, B Alonso, B Antón, I Arenas, C Cabré, F Marqués, E Muñoz, MA Molina, N Cancelliere, S Pastor, L Frade, P López, I García.

Internal Medicine Department: F Arnalich, C Fernández Capitán, JJ González Garcia, JM Herrero, MA Quesada Simón, A Robles Marhuenda, JI Bernardino, M Mora, C Soto Abanedes, AM Noblejas Mozo, JC Ramos, B Diaz Pollán, MJ Jaras Hernandez, E Martinez Robles, A Moreno Fernandez, R Montejano, A Sanchez Purificación, JC Martin Gutiérrez, PL Martinez Hernández, F la Calle, M Arsuaga, M Diaz Menéndez, E Trigo, C Busca Arenzana, T Sancho Bueso, A Lorenzo Hernández, B Gutierrez Sancerni, G. Salgueiro, L. Martin Carbonero, J. Mostaza, R. de Miguel, M.A. Martinez-López, V. Hontañon, A. Menéndez, J. Cadiñanos, J Alvarez Troncoso, A Castellano, C Marcelo Calvo, I Vives Beltrán, L Ramos Ruperto, G Daroca Bengoa, MM Arcos Rueda, J Vasquez Manau, P Fernández Cidón, C Rosario Herrero Gil, E Palmier Peláez, Y Untoria Tabares, C. Lahoz, E. Estirado, C Hernández, F. Garcia-Iglesias, E. Monteoliva, M Martínez, M. Varas, T. González Alegre, ME Valencia, V Moreno, ML Montes.

Neumology Department: S Alcolea, J Cabanillas, C Carpio, R Casitas, J Fernández-Bujarrabal, I Fernández Navarro, J Fernández Lahera, C García Quero, M Hidalgo, R Galera, F García Río, L Gómez Carrera, M Gómez Mendieta, A Mangas, E Martínez Cerón, M Martínez Redondo, Y Martínez Abad, A Martínez-Verdasco, C Plaza, S Quirós, D Romera, D Romero, B Sánchez, A Santiago, C Villasante, E Zamarrón, V Arnalich, P Mariscal, A Falcone, D Laorden, MC Prados, R Álvarez-Sala

Intensive Care Department: A García, C Arévalo, C Gutiérrez, JC Figueira, M Quintana, S Yus, MJ Asensio, M Sánchez, JM Añón, J Manzanares, A García de Lorenzo, E Perales, B Civantos, L Cachafeiro, A Agrifoglio, B Estébanez, E Flores, M Hernández, P Millán, M Rodríguez, C Gutiérrez, K Nanwani

Pediatric Intensive Care Department: B Arizcun, E Pérez, D Rodríguez, M Sánchez, U Quesada, C Román, P Dorao, E Alvarez-Rojas, JJ Menendez-Suso, C Verdu, A Gómez-Zamora, C Schuffelman, B Calderón, M Laplaza, M del Rio, I Amores, M Rodriguez-Rubio, P de la Oliva

Cardiology Department: J Ruiz, S Rosillo, O González, A Iniesta, I Ponz.

Anesthesiology Department: JM Muñoz Ramón, MC Hernández Gancedo, R Uña Orejón, P Sanabria Carretero, I Moreno Gomez-Limón, A Seiz-Martinez, E Guasch-Arévalo, C Martín-Carrasco, E Alvar, L Serrá, F Iannucelli, J Latorre, S Casares, I Valbuena, L Díaz Díez Picazo, C Rodríguez Roca: O Cervera, E García de las Heras, P Durán, C Castro, C Manrique de Lara, J Veganzones, A López Tofíño, E Fernandez-Cerezo, S Zurita, S Casares, M López-Martínez, T Prim, J Alvarez del Vayo, G Alcaraz, L Castro, J Yagüe, S Díaz-Carrasco, P González-Pizarro, A Montero, FJ Sagra, A Suárez.

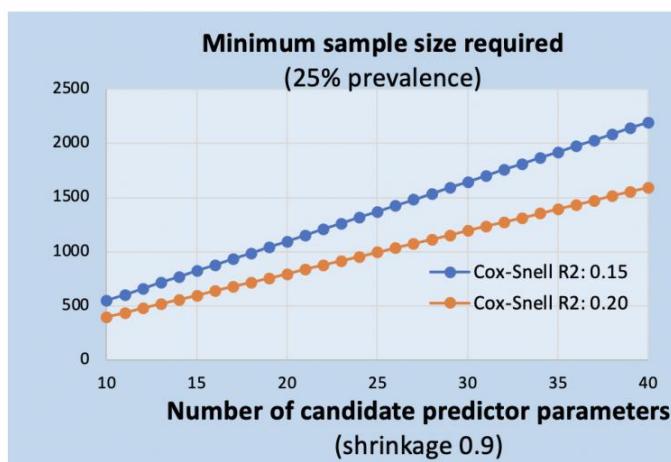

Palliative Care Unit: L Díez Porres, M Varela Cerdeira, A Alonso Babarao.

Data Entry (Medical Students): F Abellán, J Alonso, A Álvarez, M Archinà, S Arribas, T Baselga, P Barco, N Barrera, L Barrera, A Bartrina, G Bassani, P Betancort, I Blanco, C Blasco, L Brieba, F Cadenas, P Carrera, C Cascajares, A Catino, R Cavallé, D Ceniza, Y Conde, L Currás, M Daltro, A Esteban, M Fernández, I Ferrer, L Regaño, P Galindo, S Garcia-Bellido, C García-Mochales, T Gómez, C Gómez, N González, S González, J Guisández,

P Hernández, R Hernando, I Llorente, A Marín, P López, L Mejuto, M Palma, A Peña, L Platero, D Pujol, M Ramírez, M Redondo, F Reinoso, A Rodríguez, A Rodríguez, L Romero, S Sánchez, M Sánchez, P Serrano, H Serrano, T Silva, E Soria, A Suárez, B Tejero, A Torrecillas, J Torres, M Valentín-Pastrana, A Villanueva, M Virgós, M Yagüe, N Yustas.

Clinical Pharmacology Department: J Montserrat, J Queiruga, A Rodriguez Mariblanca, L Martínez de Soto, M Urroz, E Seco, M Zubimendi, S Stuart, L Díaz, I García.

Data management: MT García Morales, A Martín-Vega

Appendix Figure 1. Sample size Calculation*

Parameters	Minimum sample size required (shrinkage of 0.9 and 25% prevalence)	
	Cox-Snell R ² : 0.15	Cox-Snell R ² : 0.20
10	549	398
15	823	597
20	1,097	796
25	1,372	995
30	1,646	1,194
35	1,920	1,393
40	2,194	1,592

To estimate a 30-parameter logistic model with a shrinkage of 0.9, a prevalence of events of 25% and assuming a Cox-Snell R² of 0.15, 1,646 individuals would be needed, approximately 14 events per variable. In our study, the estimated models were carried out with much higher sample size and 30 parameters were never exceeded, despite the categorization of some independent variables such as age.
