

Supporting information, Table 1:**Correlation between liver or spleen stiffness and Child-Pugh score and MELD-Na score**

	Child-Pugh score			MELD- Na score		
	Correlation	<i>p</i> -value	R ² value	Correlation	<i>p</i> -value	R ² value
Liver stiffness	0.52 (0.38;0.66)	<0.001	0.90	1.00 (0.77;1.23)	<0.001	0.92
Spleen stiffness	0.43 (0.34;0.53)	<0.001	0.94	0.70 (0.51;0.90)	<0.001	0.93

Results are presented as association between 1 kPa in stiffness equalized Child-Pugh value or MELD-Na value with 95% confidence interval, r²-value and *p*-value
