

Supplementary Figure S1.

Fig. S1 Expression of PPAR γ protein in LV tissue of WT and KO littermates at 4 and 10 weeks. Representative immunoblots and densitometry showing total protein expression of PPAR γ . Gapdh was used as a loading control for total protein-loading. Data are mean \pm SEM (n = 4-6 mice/genotype/age). Unpaired two-tailed Student's *t*-tests were used. *, $p < 0.05$.
