

Effects of stereovision on completion times of tasks in the Augmented Reality environment.

	Patients		Healthy Subjects	
	stereonormal	stereoimpaired	stereonormal	stereoimpaired
PMT	18.9 (7.7)	21.2 (14.4)	11.8 (6.4)	12.6 (5.8)
AFCT	12.6 (6.6)	11.7 (3.9)	7.8 (3.3)	6.9 (4.8)
PT	7.3 (2.6)	8.4 (3.8)	3.6 (1.6)	4.2 (1.8)
3DDT	6.0 (3.1)*	10.3 (4.8)	3.2 (1.2)*	11.1 (18.9)

Note. Cells represent *mean (SD)*. * indicate a significant difference to the corresponding stereoimpaired group.

3DDT: 3D Detection Task, AFCT: Alternative Forced Choice Task, PMT: Perceptual Matching Task, PT: Position Task.
