

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Closely related isolates indicating intercontinental transmission.

File Name: Supplementary Data 2

Description: Salmonella Enteritidis genomes used in the study.

File Name: Supplementary Data 3

Description: Model comparison for Bayesian phylogenetic analyses.

File Name: Supplementary Data 4

Description: Inferred ages of MRCA and substitution rates of the Global and Atlantic lineages.

File Name: Supplementary Data 5

Description: Sources of international trade data of live poultry.
