

S2 Fig. Effect of eosinophils on airway epithelial cells by secreting granule proteins. Levels of TGF-β1 released from A549 cells when co-cultured with peripheral eosinophils with/without LTE₄ or montelukast (MK). The data are presented as means ± SD, n = 5. **P* < .05 and ***P* < .01 were obtained by the Mann-Whitney test. n.s., not significant.
